Conversation with Jim Gordon, November 4, 1983, in Foundation Office

K: One I forgot to ask you yesterday - when you were four different incarnations at once...where did you learn about this, did your living master tell you this?

J: No, no, no. I was just made aware of it because I finally learned about why I had the draw to be a minister or priest - it was because of the man in Washington, D.C. being a minister. And going through the ritual of being a minister that he was going through was also a driving force within me. Finally I began to realize that that wasn't my energy - that was somebody else's energy that I was trying to live. So then I started asking, where is this coming from? Who is it because it was so close. And then when I was meditating - really when I was that young, I was really more praying - all of a sudden I was lifted up into my soul like or spirit and I saw - it was like I was looking in a mirror of myself - that there were three other people besides me in the mirror. And so I said now "wait a minute - why am I looking at the mirror but see three other people." Then I heard within my mind, it said, "The soul is one, but the bodies are many at this time." And so I interpreted it to mean that there were other bodies and so then later on, I heard about a man in Washington, D.C., who claimed to be John the Beloved, and that he was trying to do some work for the world. So I meditated on it and I asked and they said, "Yes, this is one." So then I went back into meditation and I saw the energies again and he stepped forward as if to say, "I am the one," He didn't say anything, he just stepped forward, so then about a year later, I saw a photograph of him for a conference that they were having and he was going to lecture there - and so I knew then that that was the one.

K: How old were you?

J: I was 17, I guess - 18, something like that. 1

K: And he in Washington claimed to be John the Beloved?

J: But he knew it - you know he was the same soul.

K: I know, but I mean that's an interesting...

J: He didn't claim it so much as people around him knew it and claimed it for him and so he had to then - in a sense not defend himself, but go ahead and start doing something with it and not just run away from it.

K: Did he know about the others too?

J: I have no idea, no way of knowing.

K: And you're not telling me who that is. I remember.

J: Nope. I think everybody should have their privacy.

K: Well, I thought you said he was gone.

J: Yes.

K: O.K., that's cool. I think we're gonna go back to the 144,000. We discussed at one point that maybe 12,000 came from Sirius - and 12,000 you thought came from other spots - 12 twelves.

J: Well, I don't know for sure. I think that's probably the case because of the fact that there were the twelve tribes of Israel and I think that those are

symbolic and a carryover of the 12 twelves that came in from other parts of the universe to help this planet.

K: You said when we came - I don't know whether that means that we were masters in a former life...on Sirius.

J: Well, we had achieved a certain level of spiritual awareness that gave us the opportunity if we wanted to grow further to come here and learn. We had grown to a certain height - a certain level - and in order to learn more and be of better service, we could come here and advance ourselves faster as well as help humanity advance faster. So we were really being selfish in a sense because we were helping ourselves as well. It's a two-fold...

K: You said we were almost suprahuman?

J: Superhuman. In the sense that the evolution of the planet had already gone past just the mind and the mental development stage and had entered into a super-conscious---it was still a physical energy, the mind, but it was using the mind on a higher creative level. Remember how I said that at one point humanity had the power to create with the mind millions of years ago and then the power fell to the base of the kundalini and it became a creative sexual energy instead of a creative mental energy. On the planet of Clarion we had recaptured that energy creatively in the mind, we had refocused upward then and had the capabilities of creating with the mind rather than with the sexual energy. So that would be a superhuman state - superhuman in the sense that we had passed our humanness.

K: This is the first I've heard of Clarion.

J: It's a planet that existed physically for some time around Sirius, but now because of the state of the planetary system there, it's really more of an

astral or ethereal plane. There's still life there on an astral level but not on a physical level.

K: Does that happen to be the star that circles Sirius every fifty years?

J: I have no idea. It's a star - I think it's in the constellation Big Dog or Little Dog - Canis Major.

K: I think we've talked about this slightly before - there's a tribe in Africa that every 50 years the head guy has a ritual - only one person knows the ritual and passes it on. The year of the ritual he goes into a cave and he draws the heavens and he draws the start Sirius and he draws a start orbiting Sirius, which orbits it every 50 years, according to ledgend. Only in the last five or six years have they found out that there is actually a star that does that.

J: Yeah, it's a double star.

K: And they don't understand how this tribe in Africa had any idea about that or why it's so important to them.

J: Well, it's probably important to them in a sense that somehow they have an awareness either from a teacher who has come in the past and passed this tradition to them or something about having come from there. It's just like in some of the Islamic radical groups, they teach that if you die for the cause of Islam, that you will go to Orion - the nebula of Orion there to become a God in that system. Well, there are a great deal of souls here that came from Orion and they are very negative - very destructive. That's the battle that's going on right now, because they are physically oriented souls and they want to keep control of the physical universe and live in the physical universe. And that's

the battle that's going on. There is a group that is higher and a group that is physical and that's the energies that are being battled out here. Really in a way, it's a shame that humanity - the souls of the Earth - are caught between. Because those are the souls that would just normally continue their progress very, very, very slowly. It's these two energies that have come in from other areas that are causing the battles that are existing. You have to look at it this way. The reason that we came from Sirius is mainly because those of Orion came here first and began to create a destructive nature on the planet. It really didn't have to exist. And when that happened there was a need for a balance and there was a call throughout the universe for all souls who could help neutralize the negativity that had accumulated here to come at once. So that's why the 144,000 then came here - to help neutralize the negative side.

K: That was a question - let's see if we've answered it all. Where did these extra-terrestrial masters come from - did they come on purpose or have to come? Where are they now? Still here?

J: Yeah, they're here. Well, not all of them - not all of them are here now - some have already gone over to other planes or other solar systems to continue their work there. I would say probably the majority of them are here because the majority of them are caught up somewhere in karma in this world - you can't be involved in this world and not get caught up in it some way.

K: Let's go back to Clarion and Sirius. Mental creation is still physical -

J: No, it's not a physical world. It's more ethereal, more astral or mental existence on the mental plane. You see there's a universe for the physical, there's a universe for the astral and there's a universe for the mental world.

J: Yeah. Well they all superimpose. But the astral universe is much, much bigger than the physical universe. And the mental universe is even much far-reaching. This is why in creation everything is still expanding because it has all these other areas to fulfill. It can have the potential of moving further into the astral and creating more physical energy, physical expression. So our system, even though it's somewhat old and it will collapse upon itself in a few billion years - it's still in the process of creation - it's got several billion years to go but it will continue to expand and create. But the planet of Clarion and the planets around Sirius - there may be physical bodies but they are not lived on. They are an ethereal, astral or mental plane planet. For instance Mars is an astral planet - there's life on Mars but it's not a physical life. It's real funny because people kept expecting to find some life on Mars - they really hoped and thought it possible. There is life there and that's what they are sensing but it's an astral life. They are in the process of learning and growing and becoming - and some of those souls may come to the Earth to experience physical life and some may not - it's hard to say. For instance, I had a dream years and years ago - back in 1971 or 1972 - and I went astrally to Mars - it wasn't really a dream, it was an out of body experience - went there and was experiencing different things and then I went into one of the cities there - and it's a primitive nature compared to what we have here in a sense that it's a small community type set up - it's not overly populated by any means - it's kind of a rural type setting. They have libraries and things there and I was going to go into this one library and Robert Kennedy was there talking to a group of people. I found that very interesting. He had come there to help, in a sense, pass on some knowledge that he had obtained over several lives. And then after that I met a man who told me that a friend of mine was going to be coming there soon - Ralph Houston - because he had volunteered to go to Mars after he passed over. He's a spiritual master (Agni yoga) - and Ralph had volunteered to go to Mars after he had passed over and made transition

in this life. And he was going to come over and pass on spiritual information - and that they were bringing higher souls from this planet over to Mars now to continue the education project on Mars - that they had brought the evolutionary state up enough that the souls there were ready to come to a higher level of awareness. So I confronted Ralph with that when I saw him next. He said, "Well, yes, but very few people would even believe what you're saying let alone understand it." He said that he had volunteered for a sixteen year service there before he came back to live here. And usually that's what happens - a lot of times a master doesn't just stay in the astral - he's always creative, always constructive and so then he goes elsewhere to do service if he's not going to continue service here. There's never a stopping...

K: So Mars is astral so you don't have to be born - so 16 years - you already know what you are doing.

J: Right. In the astral world you are already there - you don't have birth and all that. Now those on the planet of Mars that are astral beings that are evolving go through a birthing process and they go through an evolution of life and death, but it's a different type than what we go through here - it's much longer lived lives and the death is just the giving up of the astral body - there isn't illness and all that so that one can then evolve to a higher vibrational body, you see. So it may be that that person will hold the body for a short time or for a very long time until they are ready for a higher vibrational body. But there's also other astral planets that don't have a physical expression like Mars that are in the astral universe. The planet Clarion, I think, is one.

K: That wouldn't be on a star map?

J: No. Just like Urisphante (?) within our solar system is an astral planet - it does not have a physical expression.

K: All right. On the mental creativity plane....whatever it is...

J: I want to say something. One thing that was interesting too - when I saw the movie Close Encounters - the astral beings on the planet that's astral over Mars - they looked a lot like the beings that they showed in the movie Close Encounters - the larger hands, heads. It just really...that freaked me out when I saw that and then the ship too.

K: The ship you said looked like the astral city over Phoenix.

J: It's called Sham**balla** - it's the city over the Arizona area. It used to be over the Gobi Desert of China. Sham**balla** is the heart chakra for the earth.

K: Why did it move from the Gobi Desert area to the Arizona area?

J: Well, when there was a shift in the polar caps, it didn't shift because it wasn't in the physical plane. It wasn't a physical city - it was an astral city - and the astral energy remained pretty much where it had been before. It was a physical shift that took place.

K: It's the heart chakra.

J: See this is why - see there was an ancient, ancient civilization in the Gobi Desert, when it wasn't a desert. It was a beautiful place and much of the talk of the Garden of Eden, I think, relates back to that civilization because that was really a garden, a paradise-type situation on earth. The shift helped to

refocus that life energy to the United States. And that's why you see the United States now leading the world - where before it had been the Gobi Desert area that led the world. Then that energy to some extent shifted to Atlantis and overshadowed Atlantis and Egypt for a while - mainly Atlantis. But it never - you know, the city didn't go through a shift of overlapping an area - the energy was just transferred and focused on Atlantis. But then for the United States to accomplish what it really needed to accomplish to really bring the world out of the darkness and into more light, it was needed to have a focus directly over the continent - that was one of the functions.

K: The heart chakra is obviously very important.

J: Yeah. It's the chakra that gives life - it's the first chakra in the chakra system that transfers the lower energies into the higher, and so that's why it's so important that it be focused properly so that the lower can become higher. And that's what's happening in the United States - really the United States has been an instrument by which the transfer of the lower into the higher understanding.

K: And then there's the throat. Where is that?

J: I've got it written down - I don't really remember right off...

K: Do you remember where the crown is?

J: I think it's in India.

K: I was reading some science magazines from work last night and had a weird question. The earth has chakras just as we have chakras. There was an article

in one of them about the aurora borealis and being able to photograph it in the daytime and see it. Is that the earth's aura?

J: Well yeah. The electromagnetic field is the aura of the earth. The aurora borealis would be like a registering - it would be like looking at the colors of the aura of man - it's the colors of the aura of the earth, yeah.

K: And it's north, so it would be around the...

J: Well, no. The chakra system is different on the earth than it is on man. It doesn't lay vertically or horizontally in any particular position. It's a different type of a system. I'm sure the South Pole has the same effect because it has to do with the way that the magnetic energy is collected or coming out at the poles. It's just a matter of dust or things coming into that area and catching the sun just right - I'm not sure, I'm just assuming.

K: Mental creativity...other planets - obviously - maybe not obviously. I'll just ask the question.

J: We haven't even discussed mental creation.

K: No. Let's do that and then once we do that I would like to know about karma in the mental plane. You say there's physical karma, astral karma and so probably on the mental plane there's mental karma.

J: Right. By mental creation I mean that what happens is that the masculine and the feminine come together and meditate or focus mentally their creative energies together to create a body. Now, in the beginning stages what happens is is that it's like an orgasm that takes place mentally to bring about between the two

people...that brings about an impregnation of the woman. Later on as the mental creativity really develops to a higher level there no longer is a need for that. And so then there's just a matter of focusing and creating a body between the two people over a period of time that the soul can inhabit. In other words, we would have a special room or a special place where we would go and begin to put out mental energy and begin to create a body and then with that the soul would begin to impart certain energies to it as well so it would be a three-way creativity-type situation. It's hard to conceive because it's hard to understand unless you experience it just what I'm talking about. It's a mental creation. Just like ¹Sy²baba, for instance, he can materialize things, o.k.? All he has to do is focus his energies for a moment - visualize what it is he wants in the material - and the physical material collects together to form what he wants in his hands. ¹Sy²baba, in India. That's what's happening there is the couple come together - / focus ^{they} their energy and then let a soul attach and the soul completes the focus of creation and then inhabits the body.

K: The soul that attaches - is that a combination of both of those souls?

J: No, no, no. Your soul is not a combination of your mom and dad's soul. Your soul is separate. All that's happening is that there is no physical carrying of the child.

K: And there's no physical act performed.

J: Right - the act is mental.

K: But there is a body?

J: Yeah. Right. It's just a matter of accumulating...

K: What kind of body?

J: A physical body.

K: Just like yours and mine?

J: Right.

K: Huh. So in order to do that you would have to have complete knowledge about...

J: No. Because you don't have complete knowledge of physiology now.

K: No, but I haven't tried to create anyone, either.

J: Yes you did. You've got children - that's creation.

K: But I mean mentally.

J: I don't care, that's creation.

K: Oh yeah, that's right - I did that.

J: All you did was bring life energies together and then the evolution of that life energy took place. All you do with mental creation is just speed up the process - it's not nine months anymore - it may be nine minutes or whatever, nine hours - I don't know.

K: Nine is important?

* * * just for us * * * just using it as an expression * * * It's just a coming * *

together and a focusing. Just like, if you wanted a Cadillac, if you held that in your mind long enough, you could have a Cadillac. That's creation on a mental level.

K: So that is possible here.

J: In that expression of wanting a Cadillac and drawing it to you, yes. Right now mental creation of a physical body - mankind doesn't...

K: Like Sai Baba.

J: He's a master here to present the idea to man so man will be aware that that's where he's headed. Just as he can do it now, mankind - humanity as a whole will be able to do it in the future.

K: Ruth Montgomery's book about the shift - she said that people who would start communes could get a refrigerator just by coming together and focusing their energy on that and it would happen.

J: Not right...in the future, yes. It will be a creative energy for the mind - but that's way down the line evolutionary wise. Man has got so much to do - it's not going to happen in the next thousand or two thousand or even maybe five thousand years unless mankind really makes a major jump.

(first 30 minute tape ends)

K: Let's go back for a minute to the mental creation. When you create mentally, you don't have to create say a baby - you can create anything.

J: Right. You can create an adult, it could be a child - it will depend upon the

soul and where he needs to be expressing from. If it needs to go through the childhood stages for its learning, then you will have a child created. If it needs come right in and express as an adult, then it will come right in as an adult.

K: O.K. Mental karma. How does it differ from...

J: Well, it's just a different level of existence and experience. So you are still going to create karma there but it's just a different level. I don't know what to say on it, really. How do you mean? There's still an exchange there between souls, between personalities there.

K: Isn't there always?

J: Yeah. Until you get to the spiritual universe and then everything starts to become one. That's where it all starts to blend into one again - back to the Godhead. But in this world, it's all separating out from each other and so you have the personality conflict. As long as you have any kind of exchange or expression one to the other, there's always going to be a karmic situation, whether it be good or bad. And so in the mental planes too you are creating. This is why the masters have to still be dealing with humanity because they still have karma with humanity to deal with. See this is what is going to really upset a lot of people because they don't want to see the Masters as having karma. Because we want to see the Masters as perfect. They say they are not perfect - they say they are still in the process of evolution and growth - that they are to be of service. O.K. - what did I tell you yesterday about the guides in the astral plane? One way that they can best burn their karma off is to be of service to humanity in the physical somehow, some way, as a guide. Voila! You have a master on the mental plane being of service to humanity in the

physical burning off his own karma - dissolving it.

K: And in many instances you have said that guides are your own selves.

J: Right. A lot of times our guides are just an expression of ourselves - of our own soul. And sometimes it will take on the embodiment of a past life that we actually went through but we're not aware of - or it would just take on the embodiment of a soul that would come and teach you even though it's really your own soul.

K: Speaking of being aware.... In lives, in particular in recent past lives, have we all been aware of the spiritual thing at some point in our lives? Is that why it is easier - do we find it younger? Now.

J: We personally? (Yeah) As you evolve and grow and begin to burn off some of the karma and the attachments of this world, then it's easier to get into the spiritual frame of mind - easier, much quicker in life. Also, if you have a service to perform, you are going to be led into it much quicker so then you can fulfill that service, you see? (Yes) Does that explain that? See, it just depends on the level of evolution that the soul has gone through as to how soon we are going to get involved in certain things in this world - and also to the intensity that we are going to get involved. If we need to really experience the physical realm and be very involved in business or sexually active or be involved with drugs or whatever on the physical level so that the soul can learn from that, then we are going to get all engrossed in that. If the soul has been through that and doesn't need that in this incarnation - it needs something else - then that's what you are going to be involved in. Hopefully and eventually what happens is that all that has been accumulated, gone through and worked out to the point where you no longer have to be even involved in that. That's always on the out-

skirts, maybe, of your vision - you know it's out there - but it doesn't have to affect you. Then you can go ahead and continue your growth, emotionally, mentally, and spiritually, depending upon what the soul needs.

K: I am speaking of us in particular - this group that is here together. When we go all the way back to Egypt, you were talking about you and me - there was some sort of spiritual knowledge then, there was a spiritual knowledge when you were Isiah, I remembered past lives for some reason - which I don't now.

J: Well, it's not that important - each life is important unto itself and the things that you are given in that life are important. You have ~~a~~certain level of service to perform and if you don't need that other, it is not made available to you because it would only sidetrack you from your real service. Now, a lot of people want to be clairvoyant~~but~~ they may not handle it properly or it's only going to sidestep them from their real purpose. Or they want to be President of a Bank but they are supposed to be a garbage collector in this life so they can help people in a different way or help themselves in a different way - or whatever. It's just a matter of where the soul needs you to be as to where you are going to be.

K: So we don't necessarily know in each life, or have some spiritual awareness in order to get through the astral and come back faster - or do we?

J: Well, the only way you can get through the astral faster after you have passed over is if you have begun to - in a sense - withdraw a lot of the energy in the astral body - to break it up. In other words, you have begun to dissolve the karma there so that no longer do you need to go back to that plane. Burn it off. It's like going to a doctor's office - you go in - you wait around for a while and you go in. Depending upon what the doctor needs to do is how long you are

going to stay in that office before you leave. It's the same way - when you get into the astral plane, it depends upon how much you owe there and how much you have to learn from there as to how long you are going to stay there.

K: It differs? From lifetime to lifetime.

J: Yes. It differs each life too because each time you progress and grow you burn off astral karma and hopefully you detach yourself enough from the emotional plane to where you don't have to go back there as often. That's why certain souls can come back very rapidly because they don't have the necessity of staying on the other side that long, and their life is more focused for service to humanity.

K: A while ago - months - we were talking about my two grandmothers and my great aunt, and of one of them - I think it was my great aunt, you said that she's kind of caught in the astral because of her own theories about heaven or whatever.

J: In other words, until you can realize that where you are at is not where you always have to be, you usually will just hang around in that plane adjusting and living and experiencing whatever is there until finally one day you look up and you go, "Oh, there's a brighter light up there than I've ever seen before, I wonder what that means?" And eventually you realize that this isn't all there is and "God, there's something else up there that I'm missing - I ought to look into this." And at that moment someone will come to them on that plane and say, "Take my hand and let's go on and I'll tell you more about this," and try to help them grow and expand beyond where they are.

K: Let's go back to the first question then - that's what I meant - a knowledge
17 that there's more - an awareness. That's what I meant about our own - this

group's particular evolvement from one life to another to another to another - it's speeded up because of that awareness - or in our lives we do in some and don't in others.

J: It really varies from life to life - sometimes you don't have it and sometimes you do have it depending upon what is needed for the soul growth and for the soul service at that time. There's a point in the evolution of the soul where man is very physically oriented and he's grounded on the physical and so he has to start looking up to get to the point that he wants to be and so then he starts focusing upward and closing in to that perfection by focusing to a one pointedness. So you have like a triangle, the base of the triangle represents the physical universe that we're very involved with and as we begin to look upward and climb up this pyramid or triangle to the top, we're headed toward a higher self. And in the process we have to burn off karma at all these different levels in order to reach that perfected state at the top. That's the leaving of the physical universe - when you reach that point, then you no longer have to remain in the physical universe - then you have the reflective quality on the opposite side of the universe which forms an inverted triangle - so then the Masters are focusing their energy downward, you seem from the spiritual universe - really it's God focusing downward to create this focus of perfection here to draw the souls upward. There's also an inverted plane - this is going to be very hard to do on tape - there's also an inverted growth pattern that at one point in the evolution from the physical universe as you are going up this triangle upward to the one point up here - there's one point in time when the karma has been burned off as you are going up step by step by step up this focus of your evolution that you have to again be aware of where you came from - of all that you have experienced up to this point - o.k.? And be aware that you have burned off a lot of karma , then you are working toward a real point now - a real point of soul evolution at this point. So the focus

begins to focus downward as well as upward - downward to the humanities below you and upward to the God within you. And this is where the masters are in the mental plane - in the higher mental plane they begin to focus downward now unto humanity because they know that to go further now they have to focus downward to help those souls down here because what happens is that those that are involved in this level down here create a pull - a draw back to the physical world. This is a trick of Kaal - he tries to keep all these souls involved and so he tries to focus - keep a magnetic pull to keep the soul back down this way - to pull them back down. And so that's why you get this energy of the star coming back down here at this level. The masters have to overcome that by being of service to humanity rather than being drawn back down to humanity.

K: And so it's not like this.

J: No, it is like this too because see there's also the God within - the true creator up here focusing his energies down this way and creating in a sense a true magnet himself here at the higher levels of the physical world - saying here I am, come unto me.

K: Is that symbolized right here by the third eye?

J: In man, yes.

K: So I guess my question is that the masters have karma to burn off on all levels, I guess.

J: Eventually in the process of the evolving of the soul, when the pull begins to come down again, if the master focuses properly on that pull, he becomes a master of service, the soul becomes of service to humanity. If it focuses

improperly he gets caught in the world once again and then has to begin his evolution to some extent - he'll come back into the world with the knowledge that he has, but he'll be caught up again in the karma of the world and have to evolve himself through it again. So he won't be able to be of service as well and his focus will be more to himself and for his own gratification to some extent.

K: Even Jesus?

J: No, because a living saint, who is a direct embodiment of God, is outside the physical universe. He is coming from the spiritual universe. You see. Now Jesus lived a life of a man. His embodiment was as a man, he lived a life of a man and it wasn't until the very latter years that he became the embodiment of God. He wasn't the embodiment at the moment of his birth - that's very, very rare. He became the embodiment at the time that John the Baptist turned a spiritual lineage over to him - because John the Baptist knew he was soon to die. So he then turned over that lineage to Jesus to take over as the Living God - the living presence - at that time.

K: So it is something that is given to a living saint?

J: It's always passed one to the other - the traditional master passing his lineage to another master. It comes from the same episodes where a living saint passes on the right of expression to a disciple of his.

K: So Charan Singh will do that for one of his disciples?

J: Right. He's already grooming a soul on the inner. I'm sure consciously on the outer, I'm sure that person does not know, but on the inner he is being groomed

for the day when Charon Singh passes over...that lineage...that consciousness then passes over to that soul.

K: Jesus had 12 disciples. Is there a certain number that a living master can take on?

J: No, it just depends on however many have gone to him at that time. Jesus had 12 disciples or apostles because he had certain things that needed to be accomplished in the world - he wanted to upgrade the evolution of the western hemisphere as much as he could and he could only take in so many who wanted to come to him while he was alive as a living saint and effect those lives according to the evolution of their soul. But then he wanted the teaching to go out to the western hemisphere to upgrade the thought processes of man - to make them think - to make them ponder - to make them grow beyond where they were at that time. So he sent his apostles out to change the consciousness of the Gentiles. That's why this is called the Age of the Gentiles because the Jewish nation had a focus upon one God, had more of a spiritual focus even though they were losing it back then even. But it needed to be brought about into the world of the Gentiles - to drop the idols - to drop this focus on the physical and to focus more into the spiritual. So he knew that the only way he could accomplish that and carry it on was to send some teachers out into the world - not living saints - but teachers, out into the world to help raise the focus from the physical and astral more into the spiritual.

K: I think you anticipated my question, which is not unusual. Who did Jesus pass on the living saint - if they pass it on to the next one, who did he pass it on to?

J: I'll share that some other time. Ha, ha. I'm not going to say right now but

I'll pass it on some other time.

K: Anybody I know?

J: I don't know.

K: Yes you do. (laughter)

J: I'll share that some other time.

J: Well, by tradition, he passed it to Peter.

K: I know that that's the tradition.

J: Well I'm sure that that's the case - he probably passed it on to Peter. Then Peter took the role of being the initiator of the church but that lineage did not continue. That lineage eventually died out. Though there is a story that goes around of a woman who went to the Philippines and was initiated and had the lineage passed to her just recently. So I don't know, it could be that it's still lives. I've never been confirmed on that though.

K: But you don't feel that it was Peter?

J: No, I feel that then Peter probably passed it on to someone else at his death.

K: You said tradition said that it was passed to Peter.

J: And I think that it was - I have no confirmation on that, I just know that at Peter's death, it did not go into the Papal Lineage like the church says.

K: So then Peter was a living saint?

J: Right. I don't know, I'm just saying, I don't know for sure - I've never confirmed this meditation-wise. I was going by tradition though. If what is said in the Bible is true, then yes - it was passed to Peter and Peter had to have passed it on to somebody else or it died with him. I feel that he probably passed it to somebody else but then politically the energy separated - politically one way and spiritually another - I think at that point.

K: When we were talking about the two triangles - I drew one on top of the other and it ended up looking like a chalice or grail which reminded me of the story of Joseph of Aramethea...taking the Holy Grail to England. The Holy Grail was a cup...

J: Well no, you have to realize that the Holy Grail is symbolic of the blood lineage, you see. Grail, in terminology, really represents lineage or namesake. If you look at it one way and you really do some studying, you'll find that a person - a man could not become a rabbi unless he followed traditional laws the synagogue at that time - or of the temple, not synagogue. And one of them was that he had to be married - o.k., he had to be married - that was a law. To be a rabbinical student or to become a rabbi, you had to be married. Also the beard was very important in the tradition. This is why Jesus really didn't grow a beard or longer hair until later on in life. He followed more of the Roman tradition of the day because of the way civilization was set up at that time - and also because of his travels. So Jesus married Mary Magdeline - that's what the Wedding of Cana was all about - that's where he performed the first miracles and really it was his own wedding. And they had children and from there when Jesus was pronounced to die at crucifixtion, Joseph of Aramethea then took the blood lineage of the family of Jesus out of Israel for fear that they too

would suffer some consequence of death or something - because what they were doing was attacking Jesus because in a sense he was claiming that he was of the blood lineage of David - the House of David.

K: Which he was.

J: There's a lot of controversy there yet. I don't know - I've never been confirmed that either so I can't say. I'll have to meditate on it and see. Traditionally he was supposed to be of the house of David.

K: I thought you said the other day - maybe I was wrong - that he was David.

J: He was David, but that doesn't mean that he was born in the house of David, of the lineage of David - I don't know. He was David in another lifetime, right. See, that's what the tradition really meant - that this was David returned - but it became later to be translated to mean that he was going to be of the blood lineage of David. So it was important to protect the family because they feared that if they were attacking Jesus, they would also attack the family possibly, because they really thought that Jesus was of the blood lineage, they would also attack his family who would also be of the blood lineage. So that's why they took the family out of Israel and that's why they took them away and into England. And that blood lineage exists today.

K: How many children did they have?

J: I don't know.

K: The blood lineage exists today? *In England?*

J: Yes, and there's a secret society that knows of it. What the lineage is and where they live, etc.

K: What secret society?

J: I can't say...

K: I might as well ask.

J: There's a secret society - I'm sure there has to be - it's there - I can see it on the inner planes. I think that the family lives in France - I think the blood lineage is really split up between England and France but it seems to be stronger in France when I look at it from the other side. But I'm not sure - this is my own speculation and I've never had it confirmed one way or the other. I've never heard people talk about it or I've never heard...I'm just saying there must be a secret society. I think that a lot of the tradition of the crusades and the Holy Wars and all that somehow involved that and I think that the lineage of the knights and the barons and the lords and all this evolved out of the crusade period - I think that somewhere in that tradition is the awareness of that birthright - that heritage. And I have a feeling that all that the crusades were about was a battle trying to bring that lineage into power somehow - I don't know how - or to bring them out. And I think part of the battle was between the church knowing that blood lineage existed and trying to keep it quiet. And a group of people knew of the blood lineage and was trying to bring it forward at that time and that's what that whole thing was about. That's my interpretation.

K: So blood lineage is very important?

J: No. Mankind puts importance on blood lineage. A true living saint doesn't pass

his wisdom along blood lineage lines - he passes it to a disciple who is worthy to be.

K: So blood lineage is not very important. (No)

K: Is astral travel very tiring to you?

J: No. Oh no. Not always - it can be if it's taxing or if I've been out for a long period of time. Not so much tiring of the physical but of the astral, emotional nature. The emotional nature gets tired of functioning.

K: You function emotionally on the astral level.

J: Well, no, no, no. It's an astral body though - it's an emotional energy - and it can tax you. Like when I was in Egypt and I was out of the body for about 8 hours one day. It was very draining and the next day I was really physically sick - I had a fever and the whole thing because it just taxed me so much.

K: But say at night when you...

J: Oh, that's very charging of the physical body - that usually gives you more energy because it's a short term experience for one thing.

K: How short?

J: Well, you can experience lifetimes in a moment, you know...as far as the astral goes because you can be anywhere and do anything in a very short period of time as far as time goes here.

(End Side 2) 11/4/83
26

K: You mentioned that there was a lifetime in India when you knew me but you never told me when that was.

J: Well, it was the one just before this one.

K: That's what I wondered - after WWI.

J: Do you know who I was in the life before this one? (Yes) As Gandhi, I had many people who in a sense professed what I was teaching and came to try to help organize it and you were one of the ones in India that was very inspired by what I was doing and so you became, in a sense, a disciple of mine and worked with my wife in the society to bring about a system within the womanhood of India, to balance that out - to bring equality to the women of India.

K: So I was a woman? (Right) But what about WWI? I don't understand - if I died in 1917 in WWI.

J: O.K., where were you in WWI - I don't remember that.

K: You said I was an Englishman fighting in France and was blown up in an explosion.

J: Oh, that would explain it because that was the masculine side of your soul, you see. In that case the masculine side of your soul was expressing physically and the feminine side was expressing physically.

K: Whoa! (laughter) O.K.

J: So that would explain that very easily.

K: You said that doesn't happen very often.

J: No, what doesn't happen very often is that they don't come together physically to live or to experience together because that can be very destructive until there's a higher spiritual nature.

K: So what you are saying...

J: It doesn't happen very often that they come together. I don't know how often or how rare it is that they come back maybe on other sides of the world, masculine and feminine - I don't know - I can't say that for sure - I don't know.

K: That's interesting - that's real interesting. I mean here I've already gotten it worked out where if, even if you begin with the birth of Christ and you have what, maybe two lifetimes every hundred years,

J: Usually at the very most. Usually it's maybe one every hundred years - 1½.

K: Yeah - but there were times when people died a lot younger. There were times when the life expectancy was thirty...not what it is today. So I had come up with some like 40 lives since A.D. That's without both male and female coming at the same time - that's just one and now this could double it.

J: It doesn't always happen.

K: Did my masculine side express during the Civil War - I know my feminine did.

J: Yes. It did there too. There, though - it may have been before that. I'm not real sure - there was a battle where he died but I'm not real sure. It may

have been in the War of 1812 that that happened. I'm not real sure - I can't judge it right now.

K: We are busy aren't we? (Um huh)

K: Do you find it frustrating now having known all of us over and over and over again.

J: No, not at all. I don't mind it at all - as I see it it is just almost like a continuation of the same life in a lot of cases. It's just a different body but a continuation of the same expression of being. I find it maybe tiring at times - I don't find it frustrating. I find it tiring at times that it takes us so long to accomplish. Like I told John last night, "I'm really finding this life now exciting. It's the first time I'm seeing all that we have struggled to do for so long coming together and really happening - really coming together and we're gonna do something." This is like a culmination of a big effort over many lives.

K: At one point you said that when the body doesn't deteriorate completely it holds the soul back - once death occurs.

J: Well, o.k., it holds the astral body back in the astral. When you go over and the soul withdraws it's energy, there's still an astral body and a mental body somewhat developed in existence. And your consciousness will gravitate to one of the other areas, either the astral or the mental plane depending upon where your vibration would harmonize. Where there's a physical body down here deteriorati it does create a focus just like that magnet that I was talking to you about that pulls the soul back down to get involved in the physical - and if you don't become service oriented then you get involved in the karma of the world again. The same thing happens - the body can become a draw magnetically for

the physical focus of the soul and so it's a little harder to always keep your consciousness where you are because there's that draw back down here.

K: Well, I guess this is strange - you've read this question and I know it's weird - the fact that St. Anthony's tongue did not deteriorate - that's the story you told me.

J: That's in a sense a multi-leveled situation. One is that when an energy pattern of a very high level is imparted into a body, it preserves it - it keeps it from deteriorating. Oftentimes a saint will try to express how much energy he did put into the world by making sure that the body is preserved some way or ~~not~~ to show the manifestation - by preserving the tongue, he was showing the fact that the words that were said were true and that they should have been listened to more so than they had been and that they should be paid attention to now. Often you will find saints that because of the vibration - they've raised their bodies so high - to such a high vibrational pattern - they don't age fast or when they die, the body doesn't deteriorate rapidly. Like Paramahansa Yogananda - he did not allow his body to be embalmed. So they watched over a period of days and his body didn't really deteriorate - didn't go into a state of deterioration.

K: For how long?

J: I don't know, you'd have to get the book, Autobiography of a Yogi, and maybe write the organization and they could probably tell you more about what happened - I don't know if it was cremated or not. I would suspect that because of Indian tradition, it probably was. Remaining very supple - things like this - that's not unusual for a really high soul.

K: The mind is a tool of the physical universe. The soul is attached to the mind

to learn of itsself. Why doesn't the soul have self-knowledge? Why does it have to attach to the mind?

J: Well, when God created, God was self-aware. But to really be totally self-aware, you have to have parts of yourself to look back onto yourself. And so by putting out parts of himself - the souls - to go out and to experience and to look back unto itself, that was the only way God could look back and say, I am God. I am that I am. So through creation, he is experiencing himself and learning more of himself. The mind was to be a vehicle by which he could look deeper into himself. But because of the situation with Kaal and the physical universe separating from the spiritual universe, the mind became an anchor for the soul and not a tool of the soul. And so once the soul became involved in mind, it had to free itself once again by focusing back to God. And instead it focused downward more and more into the mind and then it became more and more engrossed in the physical eventually. That's why for many people the mind is God - to reach the mind is God. But it's not - you have to go beyond the mind.

K: You said that it would take us 3,000 to 5,000 years, maybe, to reach the state of mental creativity.

J: I feel at least that. Just by looking at the evolution of man - unless something drastic really happens and mankind as a whole really changes. Evolution as far as the soul goes and as far as man goes is very slow. It may take longer than that - I don't know.

K: You mentioned also that in the end it all collapses on itself.

J: Well, it's like a balloon. If you took a balloon and blew it up to its full

size, it would expand and expand and expand and then if you let go in the air it just goes right back in on itself. It's the same thing. Right now God is, in a sense, blowing out - it's the outbreak of God, this expression. And then he's going to inhale and then it's going to go all back into him and just collapse on itself.

K: Therefore, when that happens...everyone will be saved?

J: That's a good question - I don't know. Because see that's the physical universe, that's the physical creation collapsing on itself.

K: And if he's drawing things back to himself, that means...nope...

J: That's the first process of it. That's the physical going back unto itself - then the spiritual has to go back as well. I don't know for sure if all are saved - I don't know for sure. Because everything is of God, yes, everything goes back to God - but whether it goes back to God in full awareness of God, I don't know - I don't think so. (O.K.) You see it all is God so it all has to go back to God - it can't go anywhere else...but I don't think that it goes back with total awareness of God - being God. And that's probably why the constant recreation To quench that desire to have full awareness of self. That makes sense - you see I'm getting a lot as we are talking - so it's like he's constantly trying to bring full awareness of self unto himself and so he has to recreate and then draw back unto himself just like we come in the physical body and then we draw back to the soul to learn what we have learned from that life and then we go back into manifestation again in the physical to learn more - and then we go back to the soul again and say, "O.K. what have we learned there? Let's evaluate." That's called the last judgement, so to speak, and then we go back again.

K: That happens every time?

J: Yes. It's called the last judgement in the Bible but it's just a judgement. Then God's doing the same thing. He's expressing himself and then going back and evaluating himself - expressing himself and evaluating - that's a good explanation of it.

K: That's neat. Do they want you to talk about anything in particular? Is there anything they want us to do while you're here?

J: No this is fine - no problem.

K: O.K., this will probably take the rest of the tape - Let's hear the story about you and cancer. You said Dr. Kelly was a cancer specialist and you wanted to go into health...

J: I'll go into all of that.... Back in 1968 is when I met Dr. Kelly for the first time. He was working with cancer patients then but I wasn't dealing with cancer then - I was just dealing with general health. He was in Grapevine, Texas and I would go to him and he helped me a lot physically to get things in order for my spiritual work. Then about 1971 or so - I've kind of lost track of it - all this time, I knew in the back of my mind that I had come here to be of service to my parents, especially my Mother, because in another lifetime I had known of her - I didn't really know her personally that well - but I knew of her - she was the mistress of Louis XIV. And one time while I was in the court in France visiting, there were a lot of rumors and things going on about my mother. She wasn't my mother then.

K: Who was she?

K: Who were you?

J: I'll go into that some other time.

K" Oh, Jim!

J: Well, you want to hear this story now. (Right) I kept hearing everybody put her down - what had happened was that something had happened financially within the court and they were blaming her for it even though she had nothing to do with it. It was an overexpenditure of money that people were very upset about and the blame came back to her even though it wasn't her fault. And there was a lot of bitterness and hatred aimed at her at first and then it was just kind of forgotten - kind of pushed aside politically. But she couldn't take her focus off of that unjust thing that happened to her - she withdrew from the world - withdrew unto herself, became very ill and got cancer and died. During that period I knew of her - knew what was happening and I said, in a sense, to God, "If I can ever help her, let me be of help." So through several lives since then she has gone through the unwinding of the hatred of herself and the bitterness that was created there. And this life was the last life that she had to go through the unwinding - the letting go. Well, I was born in 1949 and she got cancer in 1955 - her first cancer. She kept fighting the cancer and fighting the cancer - she had relapses and surgeries and just a lot of different things going on as the final unwinding of that karma. And I kept working with her trying to help her unwind the karma that she had created so that this time, in this life, she could let go of it completely. In 1973, spirit then told me that it was becoming close to the time when I was to leave the physical body - because I was supposed to leave - begin the process of leaving in 1976 and be out of the body by 1978 so that I could reincarnate again somewhere else and be of service. I mainly came

to be of service in this life to a certain group of people and family and because I wanted to help her. So in 1973 they told me that my time was coming near and Mom was going to get cancer again in late 1975. And they told me how it was going to come about and that I should warn her - and if she did not take the warning and got the cancer that it would be a way for me to help her finish off all that burning of karma - trying to release it in a sense - from that time of Louis XIV. And that I could take it away from her and she could die a different death and be at peace with it for a change - be at peace with death. So, I warned her about what was going to cause the cancer and not to do it - to let it develop. But she did it anyway and let the cancer develop. So in 1975 when she first found the first knot, then she knew she had cancer again and she started the mourning process of "I'm going to die of cancer..." and all this stuff. So then, I took that cancer away from her - in a sense healed her - I took the cancer on and burned it off myself for her so she would not have to experience it. A lot of times you'll find a master will take the karma of a disciple away from that disciple, or at least take some of it away and burn it off in some manifestation so that that disciple can continue its spiritual growth. That's what I was doing with my mother - I took the cancer away from her - I took that karmic burden away from her. I knew then that I was going to be leaving anyway - I could use that as a tool to go on. It would be of service to me and it would also be of service to her. So then I took the cancer away from her and took it unto myself and so I then had the cancer.

K: And she knew all this?

J: No. Not on a conscious level because she didn't comprehend fully what was going on. But that really changed her spiritually - she really began to focus inward more and really that freed her for the first time in several hundred years to where she could begin. Then in 1976 I found the cancer and I had a biopsy so

I would be sure and so I would know what to expect then physically in the death process.

K: Where was it?

J: Hodgkin's Disease. (Dictionary definition: A usually chronic, progressive, ultimately fatal disease of unknown etiology, marked by inflammatory enlargement of the lymph nodes, spleen, and often of the liver and kidneys, and occurring approximately twice as often in adult males as females. #First described by Thomas Hodgkin: 1798-1866, English physician.)

J: It's a lymphoma cancer. So then I began the process of preparing to move on because I knew that I was to go over in 1978. So then when Hammed died, I think it was in July of 1976, he came to me and asked me if I would then take on the spiritual responsibilities - be the spiritual expression for the Coptics because they still needed a spiritual focus here. And even though John Davis was to be the administrator and spiritual focus, he wanted me to, in a sense, impart a lot of new wisdom that hadn't been brought to the Earth before. And he said, he was meant to live much longer than he did, but because he abused his body during the burial ceremonies, which we'll go into some other time (that's going to build the story up too far.), he couldn't remain in the physical body like he had wanted to. So it was necessary for him to leave and he needed somebody to continue that process of unfolding the truth and he asked me if I would stay and continue it. And I said, "Wait a minute, I'm supposed to leave in 1978." He said, "Well, I will bring proof to you of what I am saying and then we will discuss it again." So in September of 1976 I met France and Bill Chancellor, who were head coptics at the time in Mexico. They were coptics in Mexico that had gone to a memorial service for Hammed in California and then had come to San Antonio to visit relatives there. They needed to frame some ~~things~~ for a new house that they had just bought - and so France and Bill came in - and

you know that story. So they came into have some things framed at the frame shop I was working at and Hammed appeared behind France - and that was the second time I'd ever seen him. I'd never met him on the physical but anyway, so Hammed said, "Now tell her that I'm here." I said, "No, I don't do that. I don't talk to people I don't know about all this." So he stood there for a minute and then he insisted again and I said, "No, I'm sorry but you can let her know some other way." And so after a few minutes he just pointed at her and he said, "You tell her - and now!" Very, very sternly and there was no way that I could not - I knew at that moment I had to tell her because of the way he insisted. Before he had asked and at that moment he insisted. So I pulled her aside finally after embarrassing myself, in the sense of saying "I've got to tell you something but it's gotta be private. Can we go over to the other side of the gallery and I have to tell you something." She kind of looked at her husband and her son and looked back at me and said, "Well, I guess." And so we went across and I told her that this man was behind her that I did not know his name, but that he wanted her to know that her writings were true - that they were from him. And she got all excited because she knew it was Hammed - he had been dictating since the day he died to her but she wasn't sure if it was her imagination or not and this confirmed it for her and so then Hammed said, "They are the proof, that what I have said is true because they have come from the organization that I have talked about." And he said, "They can be a focus upon which you can get healed if you will allow yourself to expand your lifetime here and your service here rather than go into another embodiment to begin that new spiritual service - just take on that spiritual service here." So I said, "Give me time and let me think." So I asked him to give me until Thanksgiving of 1976. At that time I made the choice to go on and go into the treatment.

K: What treatment?

until the end of September. So on October 1st then, he and I made the commitment that I would go ahead and stay in the physical body. And he said, "O.K." and so within a few days France and Phil called and said that they would give me all the money I needed to survive if I wanted to leave my job and get well. That they had been told that this was what they needed to be doing. So I said, "Well, this is a sign that I'm supposed to do this." So I said, "O.K." So then I began my treatments of radiation and chemotherapy to get well. And Hammed then told me to go back to Dr. Kelly and contact him and I talked to him and John Abdul, who is a doctor in San Antonio who is a nutritionist and biochemist. And between the two of them, with the chemotherapy, radiation and nutritional end of it, I got well - and here I am today.

K: And there are no signs of...and you know you are not going to get it again...

J: No. You can't say that for certain. The reason I had to go through the karma of having the cancer is because my mother had to live that karma and was reliving it and reliving it and had given it so much power that it had to be lived out in order for it to be burned off completely. Some masters will take a karma and burn it off.
